

Supply List:

- 1: String
- 2: Button (with holes in the middle)
- 3: Scissors

Directions:

Measure and cut string (length 60"). Thread String through button holes (If there are 4 holes, only run string through 2). After threading string through both holes, tie ends of string together. Move button to middle of string. Begin twisting. Once it is really tight, then pull hands apart. Continually move hands back and forth to keep string moving. Have fun!
